

OBSIDIAN

FINANCIAL GROUP

Robert Pesiri, who now runs True Vision, has been maintaining my computer systems for over 5 years now. Robert has out performed himself with relation to major software/system upgrades, migrations, major location moves, and has kept my company systems running with the highest efficiency. His companies follow through is immediate and always with the utmost of professionalism responding to my every need. I couldn't be more satisfied with my computer hardware, software, and server maintenance. If my computer systems are off line, I lose money – so I only trust True Vision to make the computer systems one less thing I have to worry about.

When Mr. Pesiri started True Vision, I gave him a chance to do my two new company websites, Obsidian Financial Group (www.obsidianfg.com), and Oragin Night Club (www.truevisiontech.com/oragin). For Obsidian, I asked for a fairly simple site with old world appeal, and for them to design a classic-looking logo. I was extremely pleased with the results. As you can see, the site is classic, easy on the eye, and the logo is exactly what I had hoped for. For the Origin site, I asked for something with full flash that would appeal to club goers. The site is filled with the excitement needed and went beyond my expectations.
