

11/02/08

True Vision created a top-notch website and database management system for Airstream Jets Inc. - www.airstreamjets.com. True Vision helped us create a website that's both visually pleasing and user friendly for our customers.

In addition, the website and database management system is very easy for us to update ourselves in real time. The database management, and our control of it, was the most important aspect of what we were trying to do. We love the look and the easy usage of our all-important database. I am especially amazed at how easy it is for us to control the content of the database, enabling us to provide up-to-the-minute charter quotes for clients and real-time flight information.

It almost seemed as if True Vision was always two steps ahead and usually delivered results before deadlines. It was relief to find a company that could do what we needed at a price within our budget –only to be blown away by top dollar results!

Sincerely,

Peter Maestrales, President

Airstream Jets Inc.
